# WIRE GRABBER™

*Hanging Support for Fixtures and More, Up to 100 lbs.*

**NEW Design**

FLG3 Wire Grabber™

Patent pending

**Kits available**  
**Single with loop,**  
**and "Y" with toggles or hooks**

Now it's easier than ever to get reliable hanging support for fixtures, fixture boxes, cable tray and other static loads requiring drop wire support!

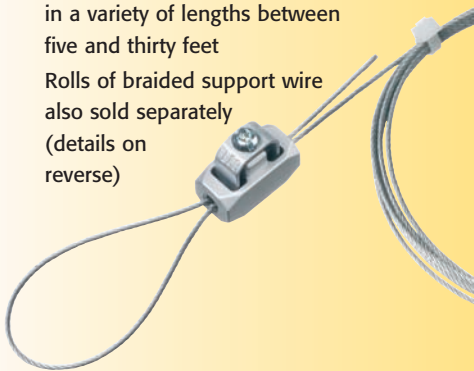

Better than traditional wire-hanging methods, **Wire Grabber™** saves time and **costs much less than competitive products.**

Perfect for dry or wet locations, Wire Grabber's hold on braided wire is unaffected by oil or grease. It holds an angular load as well as any other static load up to 100 lbs, including high bay light fixtures.

There's no internal spring. Tightening the screw engages six points of contact to firmly grip the braided wire.

- Easy length adjustment with a screwdriver, without kinking or bending the wire – no special tool required
- Connector ships fully assembled
- **Kits available** Single with looped end or "Y" kits with toggles or hooks – with 2mm (.080") braided wire, in a variety of lengths between five and thirty feet

Rolls of braided support wire also sold separately (details on reverse)

**Reliable hanging support of static loads up to 100 lbs.**

**Secure grip on wire**  
Tightening this screw engages six points of contact on wire

FLG3 Exploded View

**Easy to use**  
Push wire through connector and out the other side. Loop wire back through connector. Tighten screw.
