

**NEW**

# Low Profile Furred Wall Box® Use with Your Own Cover

*Add Arlington Box Extenders for Broader Application and Use*

## Base Assemblies for 1/2" Wall Thickness & Standard Depth Device

Uses Standard Wall Plates

### *Eliminates installation steps*

**NO** new furring strips  
**NO** wall break out  
**NO** sealing hole

<sup>1</sup> \$60/hour fully burdened labor rate

**SAVE**  
**15 MINUTES**  
and **\$15.00<sup>1</sup>**  
per BOX

*Our BOX EXTENDERS broaden applications. See below for specific conditions.*

### **1** Add Box Extenders with this condition:

Overall Total Wall Layer Thickness **GREATER** than 1/2"

Example:  
3/4" thick layer  
(1/2" wallboard  
and 1/4" tile)

### **2** Add Surface Box Extenders with these conditions:

– 1/2" Drywall  
– Deep Depth Wiring Devices

Arlington's **FSB version** Furred Wall Box®, saves time – and makes challenging outlet box installation easy!

These new **single** and **two-gang** low profile **assemblies with 1/2" raised box covers** combine with other Arlington products to offer **installation solutions** for varying wall thicknesses from 1/2" to 1-1/2" thick and varying device depths.

Designed for use with existing 1x2 drywall furring strips – FSB series outlet boxes can also be mounted on a concrete block wall *between furring strips* so installers can place the box/outlet where it's needed.

### **Eliminates installation steps**

#### **Fast, easy installation**

There's **NO NEED** to break out concrete block. **NO NEED** to install separate furring strips. And **NO NEED** to seal the block wall breakout and box.

- Integral cable securement and retention – No pullout!
- Accommodates standard and GFCI devices in varying depths – Uses standard decorator-style wall plates
- Box volume (cu. in.)  
Single gang FSB12 - 17.0 (280 ml)  
Two-gang FSB22 - 20.5 (336 ml)
- High strength –  
Withstands freeze/thaw cycles
